DIY Retro Christmas Tree Skirt

We found this plain white mini Christmas tree skirt in the dollar bin at Target. Score! Avalon has a tinsel tree in her room and it needed something to dress up the not so pretty stand. We put our heads together on a design featuring Tulip Shimmer Sheets and some sparkling trim. Four steps later, we had an adorable sparkling tree skirt. Fun...fast...and (retro)fabulous!

You will need:

Undecorated mini-tree skirt

Tulip [Fashion Glitter Shimmer Transfer Sheets](#) in Hot Pink and Gold

Bling on a Roll

6 large plastic faceted gems

Aleene's [Super Thick Tacky Glue](#)

Scissors

Parchment Paper or Fabric

Toothpick

Iron

It's just four simple steps! One: Cut trees. We used three pink and three gold. Two: Use parchment paper or cotton fabric to protect the transfers while ironing. Set iron to the appropriate setting for the fabric on the skirt, ours was acrylic. Iron the transfer on to the fabric moving the iron in a circular motion, check to be sure it's on there completely, if not iron again. Three: Glue trims on tree applying a thin bead of Tacky Glue on back of trim with a toothpick. Four: Use toothpick to lay a thin bead of glue around bottom center of skirt and press trim in place. Allow glue to dry and you're ready to roll!

Skirt seeks tree...

A well dressed tree is a happy tree!
